SKILLS AND ABILITIES

Software Development & AI Skills

- Proficient in JavaScript, TypeScript, and Java to develop functional cross-platform software systems.
- Utilized React Native, Node.js, and SQL to build, integrate, and deploy fully functional web applications.
- Engineered intelligent solutions by integrating Large Language Models (LLMs) and multi-agent AI frameworks.

IT Support & Technical Operations

- Diagnosed and resolved enterprise hardware, software, and foundational networking issues to ensure uninterrupted business operations.
- Managed digital infrastructure assets, including cloud deployment services, data repositories, and multimedia files.

Creative & Organizational Skills

- Collaborated within agile development environments, contributing effectively to team sprints and project alignment.
- Designed professional marketing brochures, presentations, and social media video ad campaigns for creative departments.
- Executed systematic software quality testing and metric tracking to validate performance under industry standards.
